

2015 AC Quality Installation Achievement

Xcel Energy is proud to partner with

DAY AND NIGHT MECHANICAL SOLUTIONS

In our inspections of 70 randomly chosen AC system installations this year, your company achieved two perfect Quality Installation (QI) scores out of two tests. Congratulations on your second year in a row with all perfect scores!

An average of 64% of the energy savings from a high efficiency AC system comes from the quality installation areas of duct sealing, equipment sizing, air flow, and refrigerant charge.

Congratulations! Thank you for your commitment to performing quality installations of highly efficient residential air conditioning systems.
